

Product Information

- A world-first innovation that instantly applies a thin layer of sanitizer liquid to any type of handle with one simple swipe.
- A simple construct means the Handle on Hygiene device can be quickly shaped into different handle sizes suitable to your shopping trolley models.
- Each swipe of the unit applies a measured amount of Lifebuoy to the surface of the handle, meaning the handle and shoppers' hands (once they touch it) are instantly sanitized.
- Each device needs 100ml of sanitizing liquid and offers approx. 5,000 swipes before needing a refill of sanitizer liquid.
- The device is produced by Barrows Global and manufactured in their China facility with 3-month warranty from date of delivery to destination of goods.

Production

Minimum order: 10,000pcs for standard units and syringes
Production capacity 10,000pcs per day
Production timeline 5 to 6 weeks tooling (depending on handle size)

Specs

Device Specs: The system is designed to work on trolleys with round handles with a diameter of between 25mm to 29mm.

Device Colour: The devices are available in three colors - red, green or blue options.

Communication Ad Space: Customizable message for an ad space of 137mm x55mm

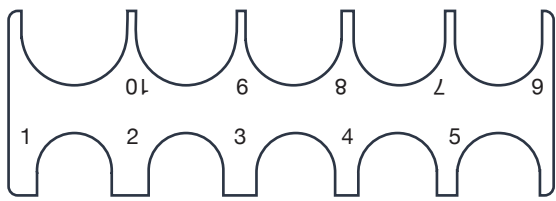

Inventory per unit: 4 x Screws, 1 x Set of collars/rubber size 1, 1 x Set of collars/rubber size 2, 2 x Handle Sanitizer tanks

Liquid Specs

Preferably use more gel-based products, like liquid. The device has been tested with Lifebuoy Hand Sanitizer Gel when engineering the solution, having tightened the seals of the device. The liquid is not included within the product and will have to be purchased separately.

Trolley Handle Sizing

The sizing tool provided will allow you to accurately capture the size of various trolley handles

Instructions:

NOTE: this exercise is only applicable to round handles. If your trolley handle is not round then record your result as '0'.

1. Starting from the smallest size (1), find the first cavity that fits the handle.
2. Slide the tool across the length of the handle
3. If the tool gets stuck at any stage then move to the next size up
4. Rotate the tool 90° on the handle and repeat.
5. Record the applicable number.

Remember to capture the store name and location in your records.
